

What the ERC "AI ban" actually allows

Operation by operation. Sources inside.

Different rules protect different things.

ERC protects judgment

Merit stays with humans. No AI summaries, no AI scoring, no draft assessments.

MERIT FENCE

NIH protects custody

Proposal content never leaves controlled infrastructure.

NOT-OD-23-149

An operation can clear **one fence** and still hit the other.

Administration versus evaluation.

Administration

WORKABLE

- Completeness checks
- Eligibility vs objective criteria
- Routing
- Decision logs

Evaluation

OFF LIMITS

- Summarizing for reviewers
- Drafting assessments
- Scoring merit

When an “eligibility” criterion requires judgment to apply, treat it as judgment.

The workload moved. The hours did not.

+57%

Applications across 12 funders, 2022–2025

+142%

Marie Curie fellowships

20% → 5 **Easy rejections.**
Same reviewer hours.

A documented protocol answers what a ban cannot: who owned each decision.

Save this. Read the full map.

Operation-by-operation table + sources (Nature, THE, Candid, EU AI Act Art. 86) on the blog.
